

References and Citations “External links”

#0 link to fit web applications dimension and scaling from w3schools

https://www.w3schools.com/tags/tag_meta.asp

#1,2 link: basically every

`target="_blank"` was taken from this link

<https://wordpress.com/forums/topic/how-to-open-custom-html-link-to-open-in-new-tab/#:~:text=You%20can%20make%20a%20HTML,this%20after%20the%20link%20address.>

#3 link to carousel creation from w3 schools, I did modifications on the code and added extra links to the photos

https://www.w3schools.com/bootstrap/bootstrap_carousel.asp

#4 photos in the carousel were taken from this link and were referred to as an external link directly to the website

<https://www.unsplash.com>

#5 Icons in the footer on each page were taken from

<https://freeicons.io/>

#6 @media chocking script in the CSS file was taken from this link with modifications that I did on the code

https://www.w3schools.com/cssref/css3_pr_mediaquery.asp

NOTE: I have been watching CSS learning videos professionally on YouTube in the last month and the CSS file is basically what I have learned from YouTube. I took the basic styling from our lecture records to secure my basic knowledge and refer to YouTube for advanced styling skills.

#7 font-face used was nunito from google fonts
